**MF310D105WB**

Titanium Grey

- Turbo Foam+
- Auto Dose
- Stain Erase
- OLED Lunar Dial
- 535mm Large Drum
- Smart Control
- BLDC Motor

## UNIQUE FEATURES

### TurboFoam+

Automatically adjusts detergent based on load size and weight. A small amount of water pre-mixes with the detergent to create a high-concentration foam that is evenly sprayed on clothes.

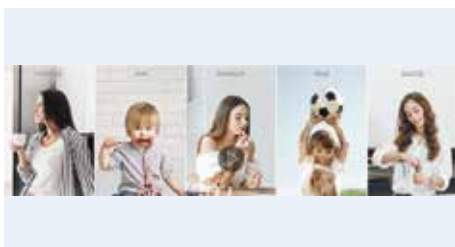

### OLED Lunar Dial

The OLED screen integrates cycle and time into a single display. With a 20% larger display area, operation is intuitive and convenient. Each turn lets you save the art of living through the beauty of laundry.

### Auto Dose

One fill for multiple washes.

### Stain Erase

The "Stain" function\* adjusts washing temperature and duration to tackle the toughest of stains: Coffee, jam, makeup, mud, and sauce. It breaks down these stains with the ideal water temperature and scrub wash effect, saving time on pre-care and handwashing, no matter the type of stain.

### BLDC Inverter Motor

The BLDC inverter motor minimizes energy loss and component wear, providing significant energy savings and noise reduction without impairing performance.

### Seamless Slot-in

Designed to seamlessly fit into any space, the ultra-thin body maximizes storage and ensures easy, corner-free cleaning with minimal seams.

## UNIQUE FEATURES

### Power Mix

Propelled by high-speed water flow, the rapidly spinning impeller thoroughly mixes water with washing powder, generating abundant foam, and having the washing powder fully dissolved.

### HealthGuard

Hot steam penetrates deep into fabric fibers to sanitize clothes and loosen tough stains, ensuring improved hygiene and better cleaning results.

### Turbo Wash

Enhance the efficiency of your laundry process by utilizing the Turbo feature for quicker and more effective cleaning.

### Drum Clean

Strong 90°C hot water flows effectively clean the inner and outer drums. With MSmartHome, users will get regular reminders to run the drum clean program and keep the washing environment clean and healthy.

### BLDC Inverter Motor

The BLDC inverter motor minimizes energy loss and component wear, providing significant energy savings and noise reduction without impairing performance.

### Seamless Slot-in

## UNIQUE FEATURES

### Lunar Dial

Inspired from the splendor and purity of luna, we have Lunar Dial as the key element of Midea Laundry Series. Different from traditional knobs, Lunar Dial integrates the functions from both knob and screen display, offering you more direct laundry experience.

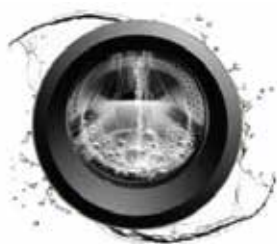

### Drum Clean

Manually selected from touch panel, then drum will have 1/3 water in and heated up to 90°C to have drum self-cleaned -- Anti-bacteria and high temperature to kill germ.

### Inverter Quattro

Leads to **70%** energy saving, **10.4%** lower noise and more than 10 years durable lifespan.

### AUTOCLEAN

Auto Clean cycle will be automatically activated to have inner and outer drum totally cleaned.

(includes programs as Cotton, Mix, Synthetic, Jeans, Cold Wash.)

### Steam Care

Steam Care will have drum heated to develop steam to reach **99.99%\*** Sterilization

(includes programs as Allergy Care and Steam Care)  
• Tested by Vkan Certification & Testing Co., Ltd.

## UNIQUE FEATURES

### Two-in-One Control Panel

Full-colored screen controls washing and drying simultaneously. Clear-cut programs and simplified processes provide hassle-free washing and caring experiences.

115cm  
Optimal Height

### 115cm Operating Height

At 115cm, the belted touchscreen is positioned at eye level, offering comfortable control without the need to raise your shoulders or tiptoe—ideal for users of all height.

### Extra-large Drum

A sleek design with a larger drum provides spacious washing and drying, reducing tangles and enabling easy handling of large items like curtains.

### Fabric Care

Clothing's shape and color, while the average 42°C low-temperature heat pump technology protects the fabric's original texture.

**HealthGuard**

Prioritizing hygiene and health, the antibacterial door seal, five-layer lint filter, and high-temperature sterilization program work together to effectively eliminate bacteria, mites, and lint for enhanced protection.

### Smart Control

Connect your smart devices to SmartHome APP, and easily control and enjoy the moment of free laundry whenever and wherever you are. Just unlock your favourite laundry program on your smart device and enjoy unlimited laundry possibilities.

### BLDC Inverter Motor

The BLDC inverter motor minimizes energy loss and component wear, providing significant energy savings and noise reduction without impairing performance.

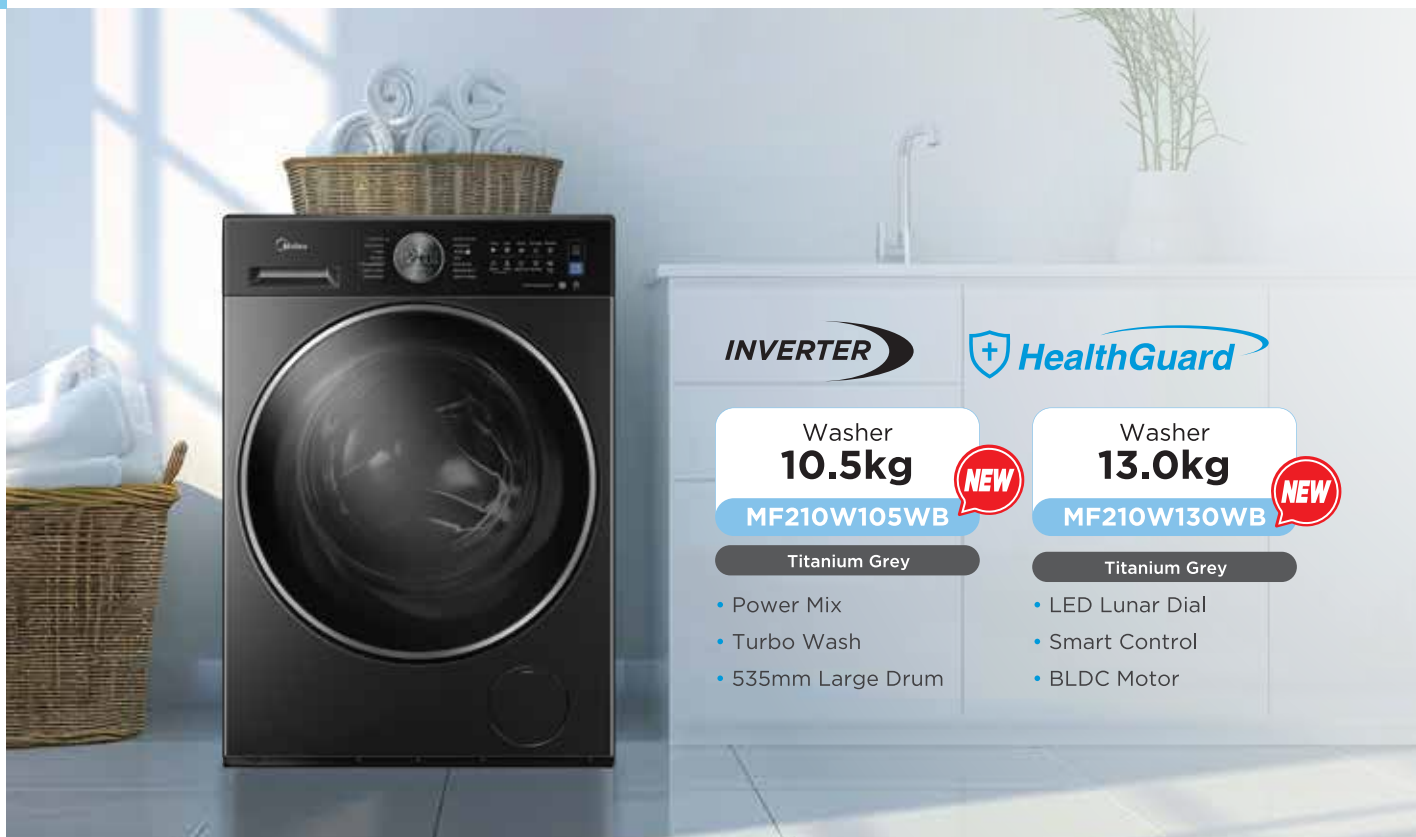

### Seamless Design

600mm slim body perfectly matches the cabinet, saving your precious house space. 5mm micro-seam installation, narrower than regular built-in design, and adaptable layout for a more pleasing visual.

- Child lock
- Reverse tumbling
- 14 Programmes and performance

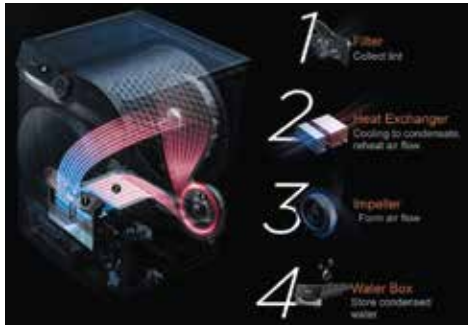

## UNIQUE FEATURES

### HYGIENE

#### Dry Laundry Hygienically

After the drying cycle is completed, the inner drum will remain at the same temperature for more than 30 minutes to ensure effective sterilization.

### Heat Pump Technology

- Motor drives the impeller to generate circulating air.
- The compressor works with heat exchanger to have air flow heat, and then goes into the inner drum to dry clothes.
- The air flow goes through the filter back to the heat exchanger, then cooled down to form condensate through compressor.

### Heat Pump Drying

The large capacity spreads the clothes evenly, and the strong air flow flattens wrinkles and prevents entanglement. Clothes are left soft and fluffy and can be worn immediately after drying.

### Energy and Time Saving

Heat pump system can reuse the heat generated during the drying process, thus to improve energy efficiency and reduce power consumption.

### Gentle Care

Heat pump drying controls the temperature in two directions to maintain the air temperature below 50°C and provides protection for high-grade fiber fabrics.

## INVERTER QUATTRO

Energy Saving and Silent Operating

**STABLE**  
The motor directly drives the inner drum, providing stronger power and keeping stable operating.

**EFFICIENCY**  
Precisely control the washing rhythm to improve washing efficiency and effect.

**QUIET**  
Prolonged service life and significant lower noises.

**SAVING**  
Space saving compared with other washers of the same capacity.

## UNIQUE FEATURES

### AUTOCLEAN

#### From Inner to Outer Drum

##### Avoid secondary pollution

The water flushes between the inner and outer drums throughout the whole self-cleaning process, removing dirt and residues away to maintain a healthy washing environment.

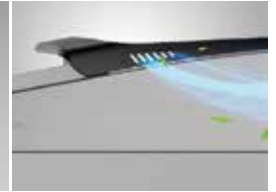

Powerful water flow flushes between the inner and outer drums, removing dirt and residues away.

Auto Clean cycle is automatically activated during drain process, ensuring a clean and safe washing condition.

**Soft Close**  
Matte Glass Lid

**Airfresh**  
All-around Fresh Care

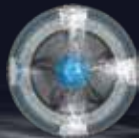

**3+1 CHANNELS**

### DEEP CLEAN

#### 3D Cyclone Cleaning System

The water cube impeller and drum form cyclone water flows to deeply clean the mixed clothes of different types and prevent them from twining at the same time.

#### PULSATOR

The lifting flow generated by the impeller in the pulsator cleans the laundry more deeply.

#### WATER CUBE TUB

The water cube tub is designed to imitate hand washing which provides gentle care for clothes.

#### 3+1 CHANNELS

The 3+1 powerful water flows can effectively prevent tangles from generating.

### Lunar Dial

#### Working Status at a Glance

Inspired from Midea logo, integrated with program display and process tracking, Lunar Dial is regarded as Midea Laundry's key visual element.

### Independent Design For Softener

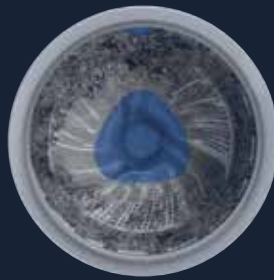

#### Smooth Laundry Better

\*exclude MA200W75 & MA200W85G

## Hygiene

#### Advanced Cleaning and Sanitization

For children and seniors who are more sensitive to bacterium and germs, Hygiene provides special care to protect their health.

Based on original programs, Hygiene provides:

Prolonged washing time

Enhanced tempo and water flow

3 times rinsing (Once more)

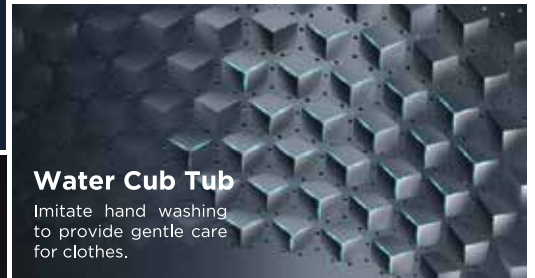

### 15' Quick Wash

A Cycle for small loads of laundry will be finished within 15 minutes. Never in a hurry, and always be at your best.

### Water Cub Tub

Imitate hand washing to provide gentle care for clothes.

### ONE TOUCH WASH

#### Fuzzy Logic Technology

Just power on and press Start.

The Fuzzy Logic is activated to weigh the laundry and automatically select the proper program accordingly. Water level and time is set, offering you a worryless laundry experience.

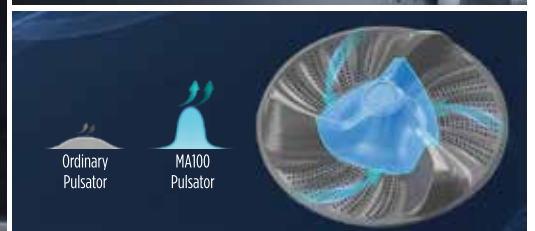

1 Power on

2 Start

# SEMI AUTO WASHING MACHINE

## UNIQUE FEATURES

### Durable Body

The body design is mainly made of anti-rust material, which is hardly rusted and more flexible than steel. Even in tough circumstances, it's more durable and hard to be dented.

### Higher Back Control Panel

Best viewing angle for better user experience.

### Large Knob Design

Easy to operate and recognize functions displayed.

### Humanized Hook Design

The washing tank cover is removable. And the hook is designed as kit for hanging the cover to free your hands.

### Dual Force Pulsator

The independent big and small pulsators will generate different water flows in multiple directions and levels to stimulate hand-washing performance.

### Airfresh

Thanks to the unique AirFresh design, the water can be effectively taken away from clothes by the inner and outer air circulation.

### Easy-to-clean Metal Lint Filter

The removable filter is made of Metal material which ensure **HYGIENE** condition during the washing process, it can also be easily taken out, so that leading it to be simple to clean up the lint, fluff and particles. It only takes a small effort to keep your machine working its best.

### Water Inlet Selection

The switch can control water inlet direction, switch to left to let water flow in wash drum and right to let water flow in spin drum which can enhance rinsing effect.

Hence there's no need to move water inlet pipe anymore.
