By Ken Wong - on 31 May 2023, 12:11pm

As part of its 15th anniversary celebrations in Singapore, Midea announced the launch of a smart flagship standing air conditioner and a washing machine that comes with a pet cleaning robot!

Midea's Air 5D Space Station Air System

These days we all want more from our devices. Well, now you can have a standing air conditioner that not only keeps you cool, but combines the functions of a dehumidifier, humidifier, aircon, ventilation fan, and air purifier all into a single device. The Midea Air 5D Space Station Air System comes with a 3L water tank with a silver ion coating, ensuring cleaner and safer water storage.

With the Microclimate Sensory Mode that scientifically adjusts all five properties of air climate: air flow, humidity, temperature, purity, and freshness, taking control of your indoor climate is only a click away.

According to Midea, the Midea Air can purify an apartment by effectively removing 99.5% of PM2.5 particles with its sterilisation technology in 15 minutes.

Midea WashBot

Midea calls the setup experience of the Midea WashBot “effortless” with the user only needing to plug in the power cord, connect the inlet hose, and attach the drain hose for water supply and drainage.

The Midea WashBot also comes with a robot that can mop and vacuum the floor. When docked below the washing machine, the robot can get its water reservoir filled or emptied. To prevent tangled rollers, the robot comes with an Auto-Cut feature that automatically cuts any hair around the rollers, eliminating the need for manual cleaning and ensuring optimal performance.

Midea WashBot delivers thorough cleaning results while keeping the base station and mop cloth clean and odour-free.

Pricing and availability

We've reached out to Midea for pricing and availability of the WashBot and the Midea Air 5D Space Station Air System and will update this article when we have more information.
